CHUCK 'N' SACK

BRAND NEW! - THE FULLY FLEXIBLE SPORTS DEVICE!

WhipFlipp is an absolutely unique combination of both ball-sport and juggling. It's the very first sports device that can be manipulated into various forms or shapes. This has never been done before. It's a total smasher!

Consisting of an elastically-charged sheet with four 'grippers' and two sturdy handles to either side, WhipFlipp acts like a 'launch pad' for high-flying balls.

The trick: Depending on the ball play situation, the player decides what shape the launch pad takes on. This is a sensational sport that can be felt right to the fingertips. The new generation of ball-sport!

WhipFlipp - new ways of bringing the ball into the game.

The principle: flex and stretch!
Meaning: Whip and Flipp

First, trap the ball in the grippers in the slackened launch pad.

With the ball poised for take off, both handles are held at an outward angle. Your WhipFlipp should be positioned at knee-height, your arms hanging loose and your legs slightly bent. Ready?

Flex and stretch! The elastically-charged launch pad flicks the ball off at high speed, releasing it with great force.

This is the basis of WhipFlipp's trap & pitch technique. - so easily initiated, but with clever development potential.

WhipFlipp 

In just a few accomplished moves, WhipFlipp can be transformed into an amazingly versatile array of catching shapes.

Try these for size: 'Bag it', 'skip it', 'tub it', 'funnel it', 'husk it', 'sack it' ... doesn't matter!

Even bizarre insect heads or horns can be formed; it depends on what you do with it. It's up to you! Each 'sack-skill' receives points according to the level of difficulty or complexity.

So, while the ball is suspended in the air, whip your WhipFlipp into shape. There isn't much time... Whoever grasps the knacks uses the elasticity of the WhipFlipp to their advantage in the game.

Ball sports have never been more flexible!

WhipFlipp 

GAME VARIATION:
WhipFlipp SKILL OUT relies on speedy reaction, skill, dexterity and creativity. By playing the ball vertically only, WhipFlipp can even be played in the midst of the city rush: the space of a beach towel and plenty of sky above is all that's needed for a skill out. It can also be performed as a duel, partner and team game.

In FREESTYLE there is only one rule: no limits! Anything from contact-, over kick-, to cross-WhipFlipp is possible.

WhipFlipp SEESAW consists of two separate playing areas set at a distance from one another. Each team has to defend their area. The goal is to plant the ball in your opponent's playing field.

AIM IT! KICK IT! GRASP IT!
WHIPFLIPP IT!

WhipFlipp 

WHIP 'N' FLIPP

WhipFlipp exercises like few other training programmes. This includes coordination skills, conditioning, flexibility and reaction at the one time. Jointly, it builds up neck, arm, back and stomach muscles.

In WhipFlipp HURRICANE high precision is what's needed. The idea is to aim for a funnel at the top of a 9 - 14 meter high pole. In the eye of the storm the ball comes to rest. The players however, never rest.

Every game is tricky. What will always count are creativity, skill, reflexes stamina, tactics, marksmanship and teamwork. IF YOU CAN'T WHIP THEM, FLIPP THEM.
